Elit Group of Companies is a multi-generational contract furniture group operating in the furniture industry since 1984, built on strong manufacturing roots and driven by international project delivery.

The foundations of the group were laid in 1984 with the establishment of Erdem, the family's original manufacturing company. What began as small-scale production gradually evolved into a fully integrated manufacturing structure. Today, Erdem continues to operate as the production backbone of the group, focusing exclusively on furniture manufacturing, craftsmanship, and industrial capability.

In 2002, Elit Office Furniture and Elit Contract Furniture were established to manage project development, sales, and international operations. While Erdem remains responsible for production, Elit represents the commercial and global face of the group, leading all domestic and international contract furniture projects.

Elit is primarily specialized in the HoReCa sector, delivering fixed and loose furniture solutions for hotels, restaurants, cafés, and hospitality-driven environments. In addition, the group supports offices, educational facilities, public buildings, and residential developments through a structured, project-based approach.

Today, Elit Group is led by the third generation, combining decades of manufacturing heritage with contemporary design thinking, disciplined project management, and a strong B2B mindset.

The Elit logo symbol, a stylized 'E' composed of three horizontal bars of varying lengths, is positioned to the left of the year '1984'.

A Message from Elit

At Elit, we believe that furniture is more than an object, it is a reflection of purpose, precision, and partnership.

Every piece we create is shaped by experience, strengthened by craftsmanship, and refined through technology. We approach each project with care, listening closely to our partners and responding with clarity and commitment.

Our goal has always been clear: to deliver reliable, high-quality contract furniture solutions that elevate spaces and stand the test of time.

At Elit, we move forward together.

Welcome to Elit.

Craft. Design. Built.

Elit's story is shaped by the harmony between craftsmanship and contemporary design. From the first sketch to the final detail, every piece we create is guided by precision, experience, and a deep understanding of materials.

With a strong manufacturing background and an agile production structure, we develop contract furniture solutions for hospitality, workplace, and public spaces. Our teams work closely with architects, designers, and project partners to transform concepts into functional, durable, and refined outcomes.

By combining advanced production technologies with skilled craftsmanship, Elit delivers furniture that meets the demands of today's projects while standing the test of time. We believe in collaboration, consistency, and attention to detail — values that allow us to support complex projects with confidence and care.

Operating globally while thinking locally, we remain committed to quality, reliability, and long-term partnerships.

Heritage & Timeline.

1974

Resul Erdem

Grandfather came to Istanbul and worked as a furniture transporter as his first job, and his interest in the furniture led him to become a skilled carpenter.

1984

The first atelier was in Bayrampaşa, where Erdem Office Furniture was founded, focusing on seating and upholstery production.

2002

İsmail Erdem

Under the leadership of 2nd generation İsmail Erdem, Elit was founded in 2002, marking the start of its global journey with a 25,000 m² factory in Hadımköy.

2010

"Between 2007 and 2010, Elit was involved in major public buildings such as the Presidential Office and the Çağlayan Courthouse, projects that later became part of the company's public and media archive."

2025

Younde Showroom

1977

He began working as a master craftsman at Tuna Çelik (now Tuna Office Furniture), gaining experience beyond production.

1990

Multiple production ateliers of 200 m², 500 m², and 1,000 m² were established in the Bayrampaşa and Güngören areas.

2007

Elit collaborated with *Paolo Pininfarina* for a landmark exhibition at TÜYAP, elevating its brand perception through design- and ergonomics-driven furniture collections.

2010

2016

New York Office

2022

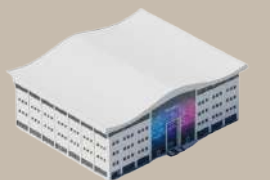

FIFA WORLD CUP Qatar2022

In Qatar, we delivered numerous hotel projects and major works. Our contributions during the World Cup played a key role in the preparation and opening of the tournament.

2026

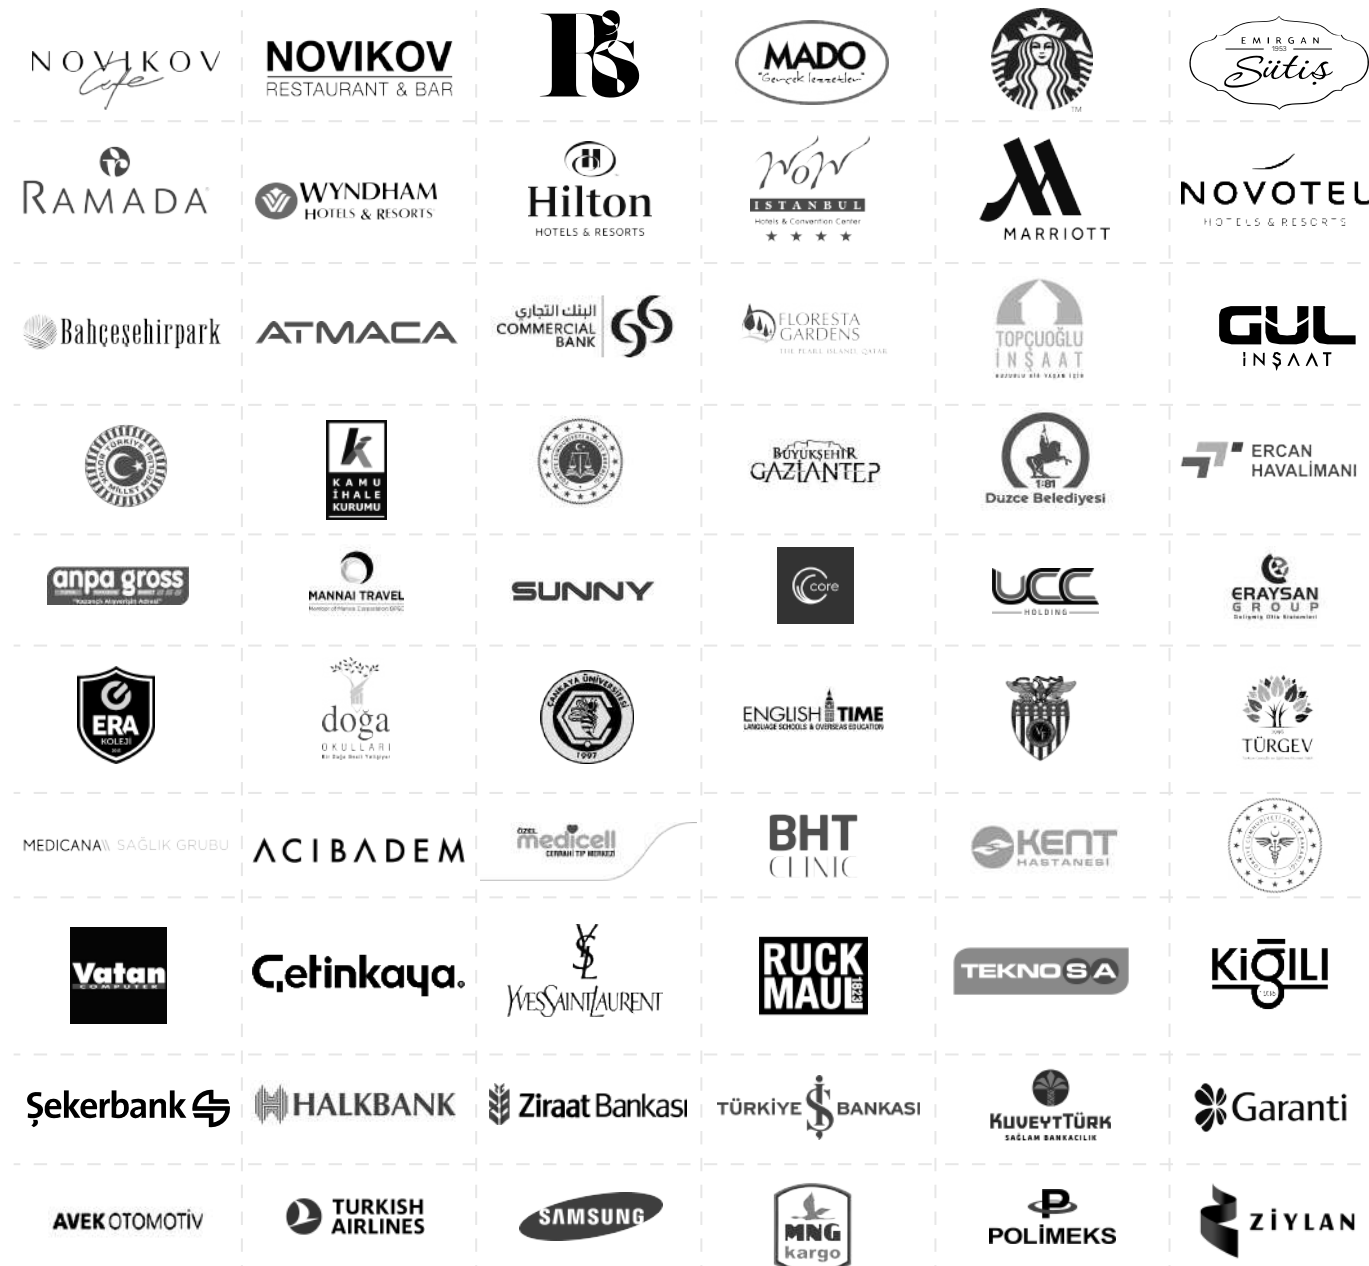

Muhammet Emre Erdem

Elit operates in its 25,000 m² modern production facility in Istanbul, embracing a sustainable manufacturing approach focused on long-lasting design, environmentally responsible materials, and efficient processes.

Sustainability Objectives

Elit integrates sustainability into its production and operational processes through measurable and structured practices. The company prioritizes the use of responsible and traceable materials, aiming to increase material efficiency and reduce waste across all product lines.

Manufacturing processes are continuously optimized to improve energy efficiency and reduce carbon emissions. Product design focuses on durability, long lifecycle performance, and ease of maintenance, supporting long-term use in contract environments.

Elit also adopts circular design principles by considering recyclability and material recovery at the end of a product's lifecycle. Water usage and resource consumption are monitored and minimized where possible, ensuring controlled and responsible production standards.

The Process.

1

Understand.

We begin by reviewing the project brief, BOQs, specifications, drawings, or visual references.

When required, we support the process by clarifying needs, aligning expectations, and defining project priorities together with our partners.

Design.

Design intent is translated into production-ready solutions through technical drawings, material selection, and detailed coordination.

Our approach balances aesthetics, functionality, and durability, ensuring designs respond to real operational requirements.

Produce.

Within our 25,000 m² manufacturing facility, raw materials enter our factory and leave as fully finished furniture products.

Wood, metal, and upholstery are produced in-house using advanced technology, skilled craftsmanship, and continuous quality control.

Collaborate.

Throughout the process, we work closely with architects, contractors, and procurement teams. Clear communication and coordination ensure smooth progress across all stages of the project.

Deliver.

From logistics to on-site installation, every step is managed with accuracy and care. Projects are delivered in line with agreed timelines, ensuring reliable execution and long-term performance.

Our Manufacturing Infrastructure.

Meet the ELIT quality

Wooden indoor chairs combine functionality and aesthetics, offering comfort, durability and a natural sense of elegance that complements a wide range of interior spaces.

Their design brings warmth and balance to both modern and traditional environments.

Each piece reflects the character of natural materials through unique textures and grain patterns. High-quality wooden surfaces age beautifully over time, developing a distinct patina.

These chairs are crafted to support everyday use while maintaining visual refinement.

Their silhouettes often emphasize simplicity, proportion and ergonomic comfort.

Wood as a material creates a strong connection between interior spaces and nature.

Versatile design allows them to be used in dining areas, workspaces or public interiors.

The combination of traditional craftsmanship and contemporary design ensures long-lasting appeal. Wooden indoor chairs remain timeless elements that enhance the atmosphere of any space.

At Elit, we move forward together.

Meet the ELIT quality

Outdoor chairs are designed to bring comfort, durability, and aesthetic value to open-air spaces such as gardens, terraces, balconies, and outdoor dining areas. They are produced with materials that can withstand changing weather conditions, including sun, rain, and humidity, without losing their structural integrity or visual appeal.

At the core of this collection is elite furniture quality, defined by precision craftsmanship, carefully selected materials, and a refined attention to detail. Every joint, surface, and finish reflects a high standard of production, ensuring long-lasting performance while maintaining a sophisticated and timeless appearance. This level of quality transforms outdoor seating into a premium design experience rather than just a functional object.

Meet the ELIT quality

Indoor bar chairs are more than simple seating solutions; they are defining elements that shape the identity of a space. Crafted with refined quality standards, this collection brings together sophisticated design and superior craftsmanship to elevate modern interiors.

Each material is carefully selected and meticulously processed, where the natural warmth of wood meets the strength of metal, resulting in a balanced and elegant aesthetic. Designed with ergonomics in mind, these bar chairs provide exceptional comfort, even during extended use. Blending modern, industrial, and timeless design languages, the collection adapts seamlessly to a variety of interior concepts, enhancing the overall atmosphere. Every piece stands out for its durability and long-lasting performance, maintaining its form and visual appeal for years.

This collection is not merely a range of products, but a statement of design, comfort, and uncompromising quality.

Meet the ELIT quality

Every armchair in this collection reflects a commitment to refined craftsmanship and enduring comfort.

Designed with attention to proportion, detail, and material integrity, each piece balances aesthetics with functionality. High-quality materials are carefully selected to ensure durability and long-lasting performance in everyday use.

Subtle design decisions define the character of each armchair, creating a quiet yet distinctive presence in any space.

The collection brings together contemporary sensibilities with timeless design principles. Every curve, seam, and surface is considered to enhance both tactile and visual experience. This is where comfort meets precision, shaped by the Elit standard of quality.

TABLETOP

MATERIAL OPTIONS

Our tabletops are crafted from premium materials that combine durability, functionality, and timeless beauty.

MATERIAL OPTIONS

MARBLE

Timeless elegance with natural veining that adds luxury and sophistication to any space. Each piece is unique.

QUARTZ

Highly durable and non-porous, quartz is resistant to scratches, stains, and impact—perfect for everyday use.

VERZALIT

Lightweight, weather-resistant, and easy to maintain. Ideal for outdoor use with a practical and long-lasting solution.

SPECIAL SURFACE FINISHES

A variety of colors, textures, and surface finishes tailored to your personal style and interior needs.

All materials are carefully selected to ensure long-lasting performance, quality, and beauty.

A Message from Elit

In companies like Elit Contract Furniture, which operate in project-based manufacturing and serve institutional clients, the concept of “trust” goes far beyond product quality alone. It is built through a combination of production consistency, process management, delivery discipline, design integrity, and after-sales support. In large-scale architectural projects such as hotels, offices, and commercial spaces, trust does not come from a single successful delivery, but from long-term reliability and predictability.

First and foremost, the foundation of trust in such companies is production quality. The durability of materials, precision of craftsmanship, and long-term performance of the furniture directly reflect the technical capacity of the company. Maintaining consistent quality standards across different projects and ensuring that every output meets the same level of excellence is essential for building lasting client confidence.

Another key factor is delivery and project management. In the contract furniture industry, timelines are often strict and non-negotiable. Delays in hotel openings, office relocations, or commercial launches can lead to significant financial losses. Therefore, the ability to manage production schedules, coordinate suppliers, and deliver on time is one of the strongest indicators of reliability.

Design execution and architectural alignment also play a critical role in trust-building. In architectural projects, furniture is not just a product but part of the spatial identity. This requires close communication with architects, accurate interpretation of design intent, and consistency from drawing to production to on-site installation. The ability to preserve design integrity throughout the process significantly strengthens professional trust.

After-sales service is another essential dimension. Being able to respond quickly to technical issues after delivery, provide maintenance support, and supply replacement parts when needed shows that the company is not only sales-oriented but also committed to long-term partnership.

Finally, transparency and communication strongly influence trust perception. Clear communication throughout the project, early identification of potential risks, and managing expectations in a realistic way reduce uncertainty and build a professional and dependable relationship with clients.

Overall, trust in a company like Elit Contract Furniture is formed through the consistent alignment of product quality, time management, design sensitivity, and after-sales support. When these elements work together, the company is perceived not just as a manufacturer, but as a long-term strategic partner in architectural projects.

Thank you for choosing Elit.
